

STAY SAFE ... PERSONAL PROTECTION UP TO 500 BAR

Aussie Pumps
SAFE OPERATOR

500 BAR HOSE SHROUDS

Hose ruptures account for 90% of operator injuries.

The hose shroud is placed on the hose at the connection to the gun. This provides effective protection for the operator as it has been tested for 500 bar / 7500 psi. An adjustable strap holds the hose shroud securely in place.

Length: 750 mm
Diameter: 41 mm
Weight 0.2 kg

SAFE OPERATOR TRAINING

New Australian Standards on the use of high pressure water jetting systems (AS:NZS4233.1-2013) states that operators of Class A pressure cleaners, typically to 4,000 psi, must be trained in identifying risk and the safe use of the equipment.

For Class B machines, 5,000 psi and above, or high flow blasters, operators must undergo formal training in high pressure jetting and be certified.

Aussie Pumps run safety training courses with a huge emphasis on safety awareness. The training program details, in a very down to earth way, the value of using indispensable labour saving equipment, without running the risk of disablement or injury.

Call Aussie Pumps for more details of the **FREE** courses.
